

Icera wins Red Herring Top 100 Europe award

*Award Recognizes Private European Firms
Driving the Future of Technology*

Bristol, April 12, 2005 – Red Herring today announced that Icera Inc has been selected for a Red Herring 100 Europe award, which recognizes the top 100 private companies in Europe and Israel excelling in innovation and technology. Icera designs and builds breakthrough baseband silicon and software for next generation mobile handsets and wireless terminals.

Stan Boland, President & CEO of Icera, said: "Each of the companies selected for the Red Herring 100 Europe has the potential to impact current markets or to create entirely new ones. We are very proud to have our achievements acknowledged in this way."

"Our list shows that despite obstacles posed by regulations, bureaucracy and tradition, innovation and entrepreneurship continues to thrive in Europe," said Red Herring editor-in-chief Joel Dreyfuss.

Red Herring's editorial staff rigorously evaluated more than 600 private companies through a careful analysis of financial data and subjective criteria, including quality of management, execution of strategy, and dedication to research and development.

Red Herring's lists of top private companies are an important part of the magazine's tradition of identifying new and innovative technology companies and entrepreneurs. Companies like Google and eBay were spotted in their early days by Red Herring editors as those that would change the way we live and work. This is the first time that Red Herring magazine has compiled a list focused exclusively on the most promising startups in Europe.

Stan Boland will be presenting Icera at Red Herring's Venture Market Europe 2005 conference, a forum for technology's most exciting companies to share their insights on the future of innovation and the entrepreneurial journey. Scheduled for April 12-14, 2005 at the Hilton on Park Lane in London, this three-day conference will explore the trends,

technologies and people affecting the European IT sphere, including the new challenges posed to European companies by emerging competitors in Asia.

About Icera Inc

Icera designs and delivers breakthrough baseband silicon and software communications products for next generation mobile phones and wireless devices, delivering high performance and unprecedented flexibility at extremely low power. Founded in 2002, Icera is headquartered in the UK and incorporated in Delaware, USA, with design locations in the UK and France and offices in Japan.
