Figure 5. 2 x 3 Display Mosaic with 2 Quadro K4000 or NVS 510 .................... 5
Figure 6. 3 x 4 Mosaic with 3 Quadro K5000 .................................................. 6
The NVIDIA® Mosaic technology layouts are built on a grid of display devices with a defined number of rows and columns. No matter the topology the display numbering starts with 0 and maps into the grid starting at the top left display, filling out the first row and then moving down the rows. As an example, a 15 display Mosaic in a 3 rows by 5 column configuration would enumerate like this:

![15 Display Mosaic Configuration](image)

Figure 1. 15 Display Mosaic Configuration
The graphics processing unit (GPU) port numbering on NVIDIA Quadro® and NVIDIA NVS™ boards start at the bottom left of the board, goes up the column of connectors and then over to the other column if there is one.

Figure 2. GPU Connector Numbering

Note: The display numbering is not always the same as the numbers stamped on the bracket.
GPU NUMBERING

The ordering of multiple GPUs in the system is determined by the workstation they are placed in. The system BIOS controls the enumeration order, so it will vary between workstation vendors. In general GPUs are enumerated starting with PCI slot with the smallest PCI Express number. The user manual or label on the workstation chassis will include a PCI Express slot map.

Figure 3. GPU Numbering

The configureMosaic utility can be used to identify the GPUs. Download, and save it, from [http://www.nvidia.com/object/mosaic-utility](http://www.nvidia.com/object/mosaic-utility).

Connect one display to each GPU. Open a command prompt and run the following commands. The display that is illuminated will be connected to the GPU requested:

| GPU 0: configureMosaic set rows=1 cols=1 out=0,0 |
| GPU 1: configureMosaic set rows=1 cols=1 out=1,0 |
| GPU 2: configureMosaic set rows=1 cols=1 out=2,0 |
| GPU 3: configureMosaic set rows=1 cols=1 out=3,0 |
When connecting the displays, start with the top left display in the Mosaic grid. Connect it to the bottom left display connector (Connector 0) on the first GPU (GPU 0). Move down the row in the Mosaic filling the displays in GPU 0 before moving to the next GPU. In the following figures the numbering is GPU:DisplayConnector:

Figure 5. 2 x 3 Display Mosaic with 2 Quadro K4000 or NVS 510
Figure 6. 3 x 4 Mosaic with 3 Quadro K5000

Note: Mosaic with more than 8 displays is available only on Quadro boards which support the Quadro Sync board.
Notice

The information provided in this specification is believed to be accurate and reliable as of the date provided. However, NVIDIA Corporation ("NVIDIA") does not give any representations or warranties, expressed or implied, as to the accuracy or completeness of such information. NVIDIA shall have no liability for the consequences or use of such information or for any infringement of patents or other rights of third parties that may result from its use. This publication supersedes and replaces all other specifications for the product that may have been previously supplied.

NVIDIA reserves the right to make corrections, modifications, enhancements, improvements, and other changes to this specification, at any time and/or to discontinue any product or service without notice. Customer should obtain the latest relevant specification before placing orders and should verify that such information is current and complete.

NVIDIA products are sold subject to the NVIDIA standard terms and conditions of sale supplied at the time of order acknowledgement, unless otherwise agreed in an individual sales agreement signed by authorized representatives of NVIDIA and customer. NVIDIA hereby expressly objects to applying any customer general terms and conditions with regard to the purchase of the NVIDIA product referenced in this specification.

NVIDIA products are not designed, authorized or warranted to be suitable for use in medical, military, aircraft, space or life support equipment, nor in applications where failure or malfunction of the NVIDIA product can reasonably be expected to result in personal injury, death or property or environmental damage. NVIDIA accepts no liability for inclusion and/or use of NVIDIA products in such equipment or applications and therefore such inclusion and/or use is at customer’s own risk.

NVIDIA makes no representation or warranty that products based on these specifications will be suitable for any specified use without further testing or modification. Testing of all parameters of each product is not necessarily performed by NVIDIA. It is customer’s sole responsibility to ensure the product is suitable and fit for the application planned by customer and to do the necessary testing for the application in order to avoid a default of the application or the product. Weaknesses in customer’s product designs may affect the quality and reliability of the NVIDIA product and may result in additional or different conditions and/or requirements beyond those contained in this specification. NVIDIA does not accept any liability related to any default, damage, costs or problem which may be based on or attributable to: (i) the use of the NVIDIA product in any manner that is contrary to this specification, or (ii) customer product designs.

No license, either expressed or implied, is granted under any NVIDIA patent right, copyright, or other NVIDIA intellectual property right under this specification. Information published by NVIDIA regarding third-party products or services does not constitute a license from NVIDIA to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property rights of the third party, or a license from NVIDIA under the patents or other intellectual property rights of NVIDIA. Reproduction of information in this specification is permissible only if reproduction is approved by NVIDIA in writing, is reproduced without alteration, and is accompanied by all associated conditions, limitations, and notices.

ALL NVIDIA DESIGN SPECIFICATIONS, REFERENCE BOARDS, FILES, DRAWINGS, DIAGNOSTICS, LISTS, AND OTHER DOCUMENTS (TOGETHER AND SEPARATELY, "MATERIALS") ARE BEING PROVIDED "AS IS." NVIDIA MAKES NO WARRANTIES, EXPRESSED, IMPLIED, STATUTORY, OR OTHERWISE WITH RESPECT TO THE MATERIALS, AND EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES OF NONINFRINGEMENT, MERCHANTABILITY, AND FITNESS FOR A PARTICULAR PURPOSE. Notwithstanding any damages that customer might incur for any reason whatsoever, NVIDIA’s aggregate and cumulative liability towards customer for the products described herein shall be limited in accordance with the NVIDIA terms and conditions of sale for the product.

Trademarks

NVIDIA, the NVIDIA logo, NVS, and Quadro are trademarks and/or registered trademarks of NVIDIA Corporation in the U.S. and other countries. Other company and product names may be trademarks of the respective companies with which they are associated.
