Jedox
Kristian Raue - Founder & CEO
Palo GPU - Jedox Business Intelligence

GTC, San Jose Convention Center, CA | Sept. 20-23, 2010
What is the most common feature in today’s Enterprise Software?
The answer is...

Export to Excel
Microsoft Excel is the world's No. 1 Business Intelligence tool
This is good news for Microsoft...
...but bad news for the rest of us having to deal with „Spreadsheet Hell“
Research shows:

Millions lost due to spreadsheet hell when spreadsheets run amok across an organization
Now the good news:

Palo GPU ends “Spreadsheet Hell”
Palo GPU features

- Centralized data storage
- Global formulas
- In-Memory
- Multidimensionality
- Hierarchical consolidation
- Microsoft Excel front-end
How does Palo plus Excel work?

Palo GPU

Excel spreadsheets connected via TCP/IP
Palo GPU redefines Spreadsheet BI

- Typical spreadsheets < 100,000 cells
- Palo GPU > 1,000,000,000,000 cells
- Palo GPU is a break-through technology
- Bigger and much more precise spreadsheet models than ever before.
Palo GPU with 8 GPUs

Hardware with 8 Tesla C1060 GPUs provided by Carri Systems

Performance vs. No. of GPUs

Performance Multiple

No. of GPUs
Palo GPU delivers unrivaled horsepower for Excel driven analysis and planning

... enabling fast and informed decisions in today’s fast-moving business world
Thank you!
