

## **Icera wins IET Innovation in Engineering Award**

**Bristol, UK, 12 October 2006.** Icera Inc., the cellular wireless semiconductor company, has been named as the top start-up company in a global awards scheme. Icera won the start-up category in the Institution of Engineering and Technology's annual Innovation in Engineering Awards, supported by the Department of Trade and Industry.

Judges praised the company, saying: "Icera demonstrated the qualities that all start-ups need to succeed on a global scale," and added: "The management team is one of the best in the world and has a great track record of success."

Dr. Alf Roberts, CEO of the IET said: "These awards recognize the vital role that innovation in engineering plays in the global economy. On behalf of the IET I would like to congratulate all the winners who have displayed outstanding innovation in their respective categories."

### **About Icera**

Icera has developed a disruptive new architecture for cellular phones, cellular datacards and cellular modems, the Livanto® wireless soft modem and Adaptive Wireless™ software. Founded in 2002, Icera is headquartered in the UK, with design locations in the UK and France, sales offices in Europe and Japan and representative support in Korea.
