Service-Specific Terms for NVIDIA Fleet Intelligence Service

These Service-Specific Terms for the NVIDIA Fleet Intelligence Service are an exhibit to the NVIDIA Cloud Agreement (the "Agreement") and are incorporated as an integral part of the Agreement. The NVIDIA Fleet Intelligence Service provides data to help Customers understand the health and performance of their NVIDIA GPU environments.

A. FREE CLOUD OFFERING. The NVIDIA Fleet Intelligence Service is a free Cloud Offering. Customer is not required to purchase a Subscription to access this Cloud Offering.

B. DATA COLLECTION.

B.1. Section 11.1 of the Agreement is deleted and replaced in its entirety with the following:

> Collection Purposes. Customer hereby acknowledges that the NVIDIA Fleet Intelligence Service will collect the following data for the following purposes: (i) configuration and operating system data to assess the configuration for optimal operations of Customer's GPU environments; (ii) metrics, signals from logs, settings, configurations, installed NVIDIA applications versions and settings, drivers, and performance data to assess system health and performance of Customer's GPU environments; (iii) logs relating to the Fleet Intelligence agent for diagnostics and troubleshooting purposes. This data will be available to Customer in the NVIDIA Fleet Intelligence Service dashboard. NVIDIA will use the data without identifying Customer to improve and develop other NVIDIA products and services.

B.2. Section 11.2 of the Agreement is deleted and replaced in its entirety with the following:

> Personal Information. NVIDIA will require certain entitlement information, such as name and/or email address, to give Customer access to the NVIDIA Fleet Intelligence Service. NVIDIA's Privacy Policy contains more detail regarding what data NVIDIA collects, why NVIDIA collects it, and what NVIDIA does with it.

C. SECURITY MEASURES. The parties recognize that no technology is absolutely secure. Customer will disclose information as needed to ensure that appropriate administrative, physical and technical security measures are used for the NVIDIA Fleet Intelligence Service consistent with standard industry practice and any applicable laws and regulations.
